

# Rovin' Raptors

Girl Scout Troop 5064

Robotics Team

Each year our troop engages in a project-based STEM activity as well as doing traditional Girl Scout activities such as service projects, Journeys, badges, camping and field trips. Over the past 8 years we have always earned each penny for our activities through various fundraisers, but this time we need your help. This once in a lifetime trip is critical to help ensure the momentum continues through the coming years and encourages us to pursue STEM

## HELP US GET TO GLOBALS!

If you are looking for a good investment for your 2014 charitable contributions, please consider our troop – all donations are tax deductible.

We are an ALL GIRLS robotics team. We competed at the Southern Maryland Regional Tournament and against 16 other teams at the MD State Championship for VEX IQ and received the top award at both competitions - the Excellence Award. Working diligently throughout the year, we improved our teamwork; designed and built a robot; learned how to use a programming tool; and conducted research on the role of math in robotics. Now we have earned our spot to compete in the Global Championships in Anaheim, CA and the International Summer Games in Honolulu, HI.
